EXTREME BOOTCAMPS

INTENSE TRAINING SUCCESSFUL RESULTS

Infotec's compliance management framework (CMF) focuses on training, certifying and managing the DoD Information Assurance Workforce for successful results. Infotec has been delivering training solutions for the military for over 25 years; specializing in DoD8570 IA Training.

Traveling the globe to offer DoD 8570.1 Certification training, our training team brings:

- Consistency with accountability tracking
- Modified Structures to support internal requirements
- Mobile labs
- Experienced, proven and Certified trainers
- Vendor Authorized Materials
- Ability to retake at no additional course charge

BOOTCAMP FORMAT Infotec's bootcamp structure is intense, solid and proven. In the second quarter of 2009, Infotec trained over 426 students and held a 99% Certification pass-rate.

A core team of specialists have designed the bootcamps to prepare students to take the Certification exams. In the bootcamp the students learn the material, gain best methods to retain the information, reinforce the studies with Infotec's web-based study moodle in the evening, have instructor coaching and on-line chat after class departure, are skilled in testing techniques, and are given the exam in the classroom on the last day of class.

DELIVERY LOCATION Infotec has Bootcamps available via public offerings or can hold the Bootcamp at any client's location throughout the U.S. If the client has a classroom, but does not have the equipment to support the class, Infotec has mobile labs that can be delivered to the client's location for instruction. At the close of each bootcamp, Official Certification Exams are administered in the classroom (whether at an Infotec location or the client's site). Students depart from the classroom with their certification results in-hand.

Due to popularity and success of Infotec's Bootcamps, please register early to ensure availability. www.infotecpro.com 800-720-9185
